Andrea Bonacci

DATA ANALYST — AI ENGINEER

PROFILE

Data Analyst and AI Engineer with over 4 years of experience in data-driven consulting for enterprise clients. End-to-end analytics pipelines, BI dashboards and NLP models — from ETL to production deployment with FastAPI and Docker. Current focus on AI Engineering: AI agents, agentic workflows with MCP, tool use and LLM integration in production. Academic tutor for university interns and responsible for technical interviews to hire Data Scientists and AI Engineers. I also delivered an intensive 8-hour university course on AI applied to coding.

PROFESSIONAL EXPERIENCE

LINKALAB S.R.L. · CAGLIARI — part of Lynx Group since 2025 Nov 2021 → present
Consulting company — Internal growth

• Data Analyst & AI Engineer Oct 2025 → present

AI Engineering focus: AI agents and agentic workflows with MCP, tool use, sub-agents and LLM integration (OpenAI, Anthropic). Production AI systems on client projects, including real-time voice roleplay systems (real-time voice, RAG, automatic multilingual evaluation) and AI agents for document and accounting automation (function calling, document AI). Claude Code, Windsurf and Gemini CLI in production. Academic tutor for university interns. Technical interviews for hiring Data Scientists and AI Engineers post-acquisition.

AI Agents MCP LLM Integration Realtime Voice AI RAG Document AI
Claude Code Academic Tutor Technical Hiring

• Data Analyst & Data Scientist Jul 2022 → Oct 2025

End-to-end data pipelines and BI dashboards (Power BI, QuickSight, Tableau, Looker Studio) for enterprise clients. NLP, sentiment analysis, time series. Deployment with FastAPI and Docker on AWS.

Python SQL Power BI QuickSight Tableau NLP FastAPI Docker
AWS S3/Athena

• Data Scientist — contract Apr 2022 → Jun 2022

Post-internship hire. First autonomous data analysis and modeling projects for enterprise clients.

DIFFERENTIATORS

AI + BUSINESS

Business degree + Data Science master's = I build AI that solves real problems, from idea to deployment.

AI ENGINEERING

Advanced use of LLMs, AI agents and MCP to build intelligent workflows and automate complex tasks.

UNIVERSITY SPEAKER

AI applied to coding course, University of Cagliari, April 2026 — 8 hours.

MENTORING & HIRING

Academic tutor for university interns. Leading technical interviews for post-acquisition team expansion.

SKILLS

AI & LLM

AI Agents MCP Prompt Eng.
RAG OpenAI API Anthropic API
Tool Use Function Calling
Document AI Realtime Voice
Sub-agents Hugging Face Ollama
LLM Eval Agentic Coding Config

Data Scientist

— curricular internship

Nov 2021 → Mar 2022

Master's thesis internship. Development of an Italian Emotion Analysis system for online reputation monitoring.

Speaker — University Course

April 2026

UNIVERSITY OF CAGLIARI

Design and delivery of two intensive sessions (8 hours total) on “Artificial Intelligence Applied to Coding”. LLM architecture, advanced prompt engineering, agentic coding with CLI tools, Model Context Protocol (MCP) integration and custom Skills creation for AI agents. Hands-on workshops where students built their first AI-assisted development workflows.

ON A CONTRACT BASIS FOR AN ENTERPRISE CLIENT · DETAILS ANONYMIZED FOR CONFIDENTIALITY

Real-Time Conversational Voice AI Systems

Design and development of real-time AI voice conversation systems, with automatic evaluation of the interactions. I work with real-time voice AI providers (OpenAI Realtime API, Gemini Live) and streaming transcription (AssemblyAI), multi-provider architectures with fallback and circuit breaker, RAG knowledge bases (embeddings and vector search) via function calling, automatic evaluation with anti-hallucination validation and multilingual prompt engineering. Skills integrable into heterogeneous production stacks.

AI Agents for Document & Finance Automation

Design and development of AI agents for document and accounting process automation (e.g. automatic reconciliation of related documents). LLM agents with native function calling and validated structured output (Pydantic), advanced prompt engineering; document AI to extract structured data from heterogeneous documents (XML, PDF, signed files) via parsing and information extraction; deterministic matching with rules, tolerances and confidence scoring; integration with business and ERP systems; human-in-the-loop flows.
